The 15HLLC1-1650/1540 is a wideband LC bandpass filter. This pole-placed custom part features tight control of the passband rolloff, excellent phase linearity, and high-performance rejection. All this performance comes in a compact 1" long, by 0.470" wide, by 0.177" high surface mount package. This is another example of ComNav's commitment to excellence when creating innovative designs for your high-performance requirements in custom packages of all kinds.
